Import Leave Taken

Guideline

Import Leave Taken

Guideline

1. Please complete the MANDATORY details for successful data migration.
2. This file is used to **import past leave records** (leave already taken) into the system.
3. Ensure that the **Leave Type name matches exactly** with the existing leave types in the system (including spelling, spacing, and capitalization).
4. Multiple-day leave with mixed sessions
   - Full-day spans can be kept in one row (e.g., 2 continuous full days).
   - If the span includes a half day, create a separate row for the half-day portion.
     Example: 2.5 days from 1 Aug – 3 Aug 2025 →
     Row 1: Start Date = 01/08/2025, End Date = 02/08/2025 (Full days)
     Row 2: Start Date = 03/08/2025, End Date = 03/08/2025, Start Time = 09:00, End Time = 13:00 (Half-day AM)
5. During import, you will be given the option to **deduct from Leave Balance**. If this option is ticked, the system will deduct leave balance accordingly.
   - However, we **recommend leaving this unticked**, and updating the leave balance separately using the **Import Leave Balance** file to ensure better control and accuracy.
